930
Moisture Tester

The Shore Model 930 Moisture Tester delivers quick, accurate results when testing a multitude of commodities. Featuring an integrated scale and moisture tester, the Model 930 helps verify moisture content of grain before going to market, without the need for moisture or temperature conversion tables.

Features:

- Rugged construction.
- Integrated scale and moisture tester.
- Large, easy-to-read 2-line x 16-character alphanumeric LCD display with backlight.
- Sample temperature range of 22 to 160° F.
- Moisture measurement range varies by commodity – typically between 6 to 40%.
- User adjustable calibration bias for each grain allows a match with any reference.
- Test times from 5 to 35 seconds, depending on sample temperature.
- Available as a complete portable testing package with tester and accessories contained in a rugged, custom soft-side carrying case.
- Powered by batteries or included AC adapter.

Shore Model 930 Portable Moisture Tester Commodity List

Commodities
